How to **save on insurance**

- Increase your excess (you see, higher excess = lower premium).
- Consider switching from our comprehensive car insurance to our super cheap theft and write-off car insurance. You could save up to 53%!*.
- Look into switching from comprehensive home contents insurance, to our cheaper fire and fury insurance, and pay up to 48% less.*.
- Remove all non-essential cover from your policy, like the king's cab, car hire etc.
- Check and update your policy info. Who knows, that old cellphone might still be on your policy!
- Your marital status, address, car (and the total distance you've travelled) can all affect your premium. So let us know if any of these things change.

*Savings and premiums are risk profile dependent.
